

## **Arrangement for Owners' Update Session**

The Government has announced the arrangement for residents to return to their units to retrieve personal belongings (from 20 April to 4 May), and the Independent Committee has also released the timetable in April for the second and third evidential hearings. Having received feedback from residents that they do not wish the update session to overlap with the above dates, Hop On will therefore hold the owners' update session in early May 2026. Further details will be announced in due course.

Meanwhile, Hop On is dealing with refund arrangement relating to the major repair fund and various deposits. This includes reviewing over 800,000 documents received during the handover from the former property management company to identify the situation of each individual unit; having its legal advisors examine the owners' corporation's contracts to clarify any potential legal liabilities and related matters; and working out the detailed refund arrangements.
